dc.description.abstract	This handbook provides comprehensive guidance on the planning, development, publication, implementation, adaptation and updating of WHO guidelines. Intended for WHO technical units, guideline developers, members of guideline development and external review groups, and other contributors, it describes the principles, methods and governance processes required to produce transparent, evidence-informed recommendations for clinical practice and public health policy that meet WHO standards. The second edition expands previous guidance by strengthening the integration of equity, human rights, gender and the social determinants of health throughout guideline development, by providing specific guidance for rapid advice guidelines developed in response to public health emergencies, and by addressing methodological challenges associated with specialized guideline topics. The handbook presents a stepwise framework covering guideline planning and scoping, stakeholder engagement, management of conflicts of interest, formulation of PICO questions, systematic evidence retrieval and appraisal, application of the GRADE approach, formulation of recommendations, production, dissemination, implementation, adaptation, monitoring and updating of guideline documents. It also provides methodological guidance for developing recommendations on diagnostic tests and screening tools, including the use of diagnostic accuracy studies, GRADE evidence profiles, and evidence-to-decision frameworks that incorporate test performance, patient-important outcomes, feasibility, resource implications and implementation considerations. Throughout, the publication emphasizes methodological rigour, transparent and inclusive decision-making, and the central role of the WHO Guidelines Review Committee in ensuring the quality, credibility and consistency of WHO normative guidance.	
dc.description.tableofcontents	Chapter 14: Strong recommendation when the evidence is low quality; Chapter 15: Using evidence from qualitative research to develop WHO guidelines; Chapter 16: decision-making for guideline development at WHO; Chapter 17: developing guideline recommendations for tests or diagnostic tools; Chapter 18: Incorporating a complexity perspective into WHO guidelines

Original bundle

The image shows the front cover of a book. The background is a dark, textured surface with a pattern resembling tree bark or a similar natural texture. In the center, there is a white rectangular area containing the book's title and publisher information. The title 'WHO' is in large, bold, black capital letters. Below it, 'Handbook' is in a smaller, italicized black font, followed by 'Guideline Development' in a larger, bold, brown font. Underneath the title, '2nd edition' is written in a small, italicized black font. At the bottom of the white area, there is a small black logo of the World Health Organization (a caduceus) followed by the text 'World Health Organization' in a bold black font.
